**Listing of Claims**

1.-31. (Canceled)

32. (Currently Amended) A two-part adhesive comprising a first part which comprises a light-stable isomer of a 2,4,5-triarylimidazolyl dimer and a second part which comprises a secondary or tertiary amine and a polymerizable material containing ethylenically unsaturated bonds, wherein said secondary or tertiary amine is N-methyl diethanolamine.

33. (Original) The adhesive of claim 32 wherein said second part further comprises a solvent.

34. (Original) An activated adhesive system comprising a combination of the first part of the two-part adhesive of claim 32 and the second part of the two-part adhesive of claim 32.

35. (Original) A set adhesive system comprising the reaction product of the first part of the two-part adhesive of claim 32 and the second part of the two-part adhesive of claim 32.

36. (Original) The adhesive system of claim 35 which is removable from a substrate to which the adhesive is adhered by stretching the adhesive to at least about 150% of its initial length at an angle below about 35° from the substrate.

37. (Original) The adhesive system of claim 35 wherein the cured combination is rigid.
